"#"at the end indicates the package specification code.

- The chip ferrite beads BLM series is designed to function nearly as a resistor at noise frequencies, which greatly reduces the possibility of resonance and leaves signal wave forms undistorted.
 BLM series is effective in circuits without stable ground lines because BLM series does not need a connection to ground.
- 2.The nickel barrier structure of the external electrodes provides excellent solder heat resistance. Also it can be used up to 175 °C.
- 3.BLM_K series can be used in high current circuits due to its low DC resistance. It can match power lines to a maximum of 4ADC.
