Features

- 1.The chip ferrite beads BLM series is designed to function nearly as a resistor at noise frequencies, which greatly reduces the possibility of resonance and leaves signal wave forms undistorted.

 BLM series is effective in circuits without stable ground lines because BLM series does not need a connection to ground.
- 2.The nickel barrier structure of the external electrodes provides excellent solder heat resistance.3.BLM31KN series can be used in high current circuits due to its low DC resistance. It can match power lines to a maximum of 6ADC.
- Extended the spec of former BLM31PG/41PG series. Got larger rated current at same impedance value of BLM31PG/41PG series.
